This application is before the examiner for consideration on the merits.

I. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. David A. Novais on 22 June 2004.

AMENDMENT: The non-elected inventions of claims (24), (25) and (26-27) are cancelled to put the instant application in a condition for an allowance.

II. The elected invention is allowable. The non-elected inventions of claims (24), (25) and (26-27) are requested to be cancelled to put the instant application in a condition for an allowance. They are all being discussed.

III. The cited prior art submission filed on 08 September 2004 has been considered as that in the parent application no. 09/745,698 now patent no. 6,664,034.

IV. A. (1) It is allowed to claim by a functional, characteristic, conditional, physical and/or chemical property of a material and /or process. (2) However, a claimed functional, characteristic, conditional, physical and/or chemical property of a material and/or process carries

with a risk (In re In re Schreiber, 44 USPQ2d 1432). It is reasonable that the Office is not supplied, provided or equipped with a sufficient facility to carry out a test for the functional, characteristic, physical and/or chemical properties as claimed in accordance with the authority stated in In re Best, 195 USPQ 430; Ex parte Maizel, 27 USPQ2d 1662 or Ex parte Phillip, 28 USPQ2d 1302. The language "light of a wavelength chosen such that said dye attenuates said light " or the like is considered as the functional or characteristic property of a material. It has been considered and searched as appeared.

B. In re Schreiber, 44 USPQ2d 1429 states that "A patent applicant is free to recite features of an apparatus either structurally or functionally. See In re Swinehart... 169 USPQ 226, 228... Yet, choosing to define an element functionally, i.e., by what it does, carries with a risk.

V. The following is an examiner's statement of reasons for allowance:

(1) Edgar discloses, teaches and suggests an image development of a photographic film and electrically imaged recording comprising the steps of (1) applying a developer on an exposed photographic film and (2) using an infrared radiation scanner to capture an image. Edger discloses, teach and suggests that the use of the infrared radiation "does not expose the film" but fails to specify the functional, characteristic or conditional property of "light of a wavelength chosen such that said dye attenuates said light " as claimed.

(2) Cook et al (6,475,711) discloses, teaches and suggest an image development of a photographic film and electrically imaged recording comprising the steps of (1) applying a developer on an exposed photographic film and (2) using an infrared radiation scanner to capture an image so that the radiation "will not fog the film". Cook et al especially disclose and

require in the claims that film being coated thereon with a light sensitive silver halide emulsion layer having a dye precursor that is not so in the instant claims. Therefore, no interference process is set up.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

VI. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoa V. Le whose telephone number is 571-272-1332.

The examiner can normally be reached from 6:30 AM to 4:00 PM on Monday through Thursday and about the same time of most Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark F. Huff can be reached on 571-272-1385
